

Tasks

1. I met with Dr. Koebbe today during office hours at 11:30 using the link <https://usu-edu.zoom.us/j/2708849140?pwd=OGFCTENRb08yQTJGQUg0cWU3b2Jrdz09>.
2. I created a Github page and this is the link <https://sweetbabydave.github.io/math4610/>.
3. I chose to use Linux for my command line environment.
4. I cloned my repository on my laptop and made Dr. Koebbe a collaborator on the repository. I already had cloned my repository, so it says that it is not an empty directory because there is already a local repository there.

```
sweetbabydave@WINDOWS-FAUNA1D: ~  
sweetbabydave@WINDOWS-FAUNA1D:~$ ls  
math4610  
sweetbabydave@WINDOWS-FAUNA1D:~$ cd ..  
sweetbabydave@WINDOWS-FAUNA1D:/home$ ls  
sweetbabydave  
sweetbabydave@WINDOWS-FAUNA1D:/home$ cd /  
sweetbabydave@WINDOWS-FAUNA1D:/$ ls  
bin dev home lib lost+found mnt proc run snap sys usr  
boot etc init lib64 media opt root sbin srv tmp var  
sweetbabydave@WINDOWS-FAUNA1D:/$ cd ..  
sweetbabydave@WINDOWS-FAUNA1D:/$ ls  
bin dev home lib lost+found mnt proc run snap sys usr  
boot etc init lib64 media opt root sbin srv tmp var  
sweetbabydave@WINDOWS-FAUNA1D:/$ cd  
sweetbabydave@WINDOWS-FAUNA1D:~$ ls  
math4610  
sweetbabydave@WINDOWS-FAUNA1D:~$ git clone git@github.com:SweetBabyDave/math4610.git  
fatal: destination path 'math4610' already exists and is not an empty directory.  
sweetbabydave@WINDOWS-FAUNA1D:~$
```

5. Version control systems are software tools that record edits made to files. They are invaluable in letting collaborators work on the project together at the same time. It makes sure that they do not step on toes when working on source code together because they have their own branches of the respective master branch. This helps to reduce the possibilities of error in a project.
